

INFORMATION TECHNOLOGY

Information Assurance Professional

SUMMARY

Dedicated Information Assurance Professional well-versed in analyzing and mitigating risk and finding cost-effective solutions. Excels at boosting performance and productivity by establishing realistic goals and enforcing deadlines. Versatile IT professional with 37 years of Enterprise design and engineering methodology.

SKILLS

- Enterprise platforms
- Product Lifecycle Management (PLM)
- Project tracking
- Hardware and software upgrade planning
- Product requirements documentation
- Self-directed
- MS Visio
- Decisive
- Collaborative
- Domain Active Directory Layout
- Data storage engineering
- Information Assurance
- Risk Management Framework (RMF)
- Active Directory design and deployment
- Workstation build and deployment
- Systems Accreditation Packages
- Red Hat Enterprise Linux installation and hardening
- Network Design & Troubleshooting
- High Performance Computing

EXPERIENCE

Information Technology

02/2011 – Current

- Managed accreditation efforts for a major department modernization project involving 3 accreditation packages, each leading to successful Authorization To Operate decisions.
- Expanded responsibilities to all departmental accreditation efforts, leading to another 3 successful ATOs; currently working on 4 new accreditations, including re-authorization.
- Wrote and implemented vulnerability management for existing accredited systems.
- Coordinated with ONI Enterprise on critical design decisions and Enterprise integration through meetings and business-model analysis.
- Managed STIG compliance and hardening for different configurations and services.
- Analyzed complex systems for vulnerability and risk; supervised 5 external computer consultants and vendors.
- Managed application patches, data backup, security changes and network configuration.

Systems Engineer

02/2006 – 02/2011

- Initiated processing strategies for department analyst requirements by identifying product problems and strengths, collecting customer-experience data, and reviewing Enterprise compliance.
- Adopted a local storage solution that grew storage to over 200TB and saved just over a million dollars in purchasing and maintenance costs compared with the alternative.
- Designed, purchased and accredited a Red Hat Linux high-compute cluster for big-data processing.
- Reduced big-data analytical processing time from 30 hours to 30 minutes while enabling broader sensor, frequency and range selections.

Senior Systems Analyst

02/1999 – 02/2006

- Designed, built and deployed 3 Enterprise network solutions to improve corporate and client communications and processing requirements.
- Expanded one solution to support Washington Navy Yard, Norfolk, Virginia and Hawaii support facilities.
- Identified network software and hardware weaknesses and developed preventive strategies to improve security and avoid interruptions.
- Documented system layouts, wiring diagrams and addressing schemas to support informed solutions for upper management.

EDUCATION AND TRAINING

Florence Darlington Technical School — Associate of Science: Electronic Engineering, 1980

Electronic Engineering • Dean's list for high GPA • Class President for second year

SKILLS

Active Directory • Hardware Engineering • Information Technology • Red Hat Enterprise Linux Servers • MS Windows Servers • MS Windows Desktop • Network Design & Troubleshooting • Architectural Diagrams • Accreditation Boundaries • Risk Management • Enterprise Strategies • Vendor Relations • Photoshop • Illustrator • HTML • Team Work • Collaboration
